

## **Wanzek Construction Prepares for Future Viewpoint V6 Software®**

### **Viewpoint V6 Software selected as best solution by \$340M contractor**

**PORTLAND, OR – September 12, 2008** – Viewpoint Construction Software®, the leading provider of enterprise construction software solutions, announced today that Wanzek Construction, Inc. has selected Viewpoint V6 Software™ to fully integrate its operations.

Kevin Gourde, Vice President/Chief Financial Officer of Wanzek Construction, a heavy/industrial contractor based in Fargo, North Dakota, says Viewpoint and its industry-leading technologies were the stand-alone winners of their exhaustive and intense selection process. “From accounting to operations and all departments in between, it ranked as the number one solution. At the end of the day, the software’s user interface and functionality came out on top in all areas.”

“Viewpoint is very excited to be selected by a company of Wanzek’s reputation and stature,” said Viewpoint President Myrna Hostetler. “We see the flexibility and full features of Viewpoint V6 Software as a perfect fit for the specialized needs of Wanzek’s main focus, the emerging energy markets.”

From the outset of the selection process, Wanzek required a solution that could not only fully integrate their entire organization, but also had the technical flexibility to conform to the unique workflows required by the emerging energy market.

“With our growth and current volume, our organization could not afford to continue to try to patch together a system consisting of three different software packages. With Viewpoint V6 Software, all parts of our organization will be on one system working together as a team. We are very excited to be moving forward with Viewpoint V6 Software,” said Gourde.

The addition of Wanzek continues a growing trend for Viewpoint Construction Software among contractors ranked in the ENR 400. “With its flexibility and out-of-the-box customization, Viewpoint V6 Software delivers the functionality demanded by very large contractors without all the expense and headaches of a customized solution,” Hostetler said.

Hostetler also indicated more prospects are seeing the value of Viewpoint’s product implementation plan that ramps the organization quickly, delivers buy-in across the company, and avoids the need for specialized product coding.

Viewpoint V6 Software is replacing Sage Timberline Office.

### **About Wanzek Construction**

Wanzek, a family-owned construction firm founded in 1971, specializes in heavy and industrial projects throughout the country, including power, renewable energy, industrial and food process, heavy civil and wind energy construction.
